WESTERN MAINE

EVERGREENS

*Preferred for Christmas Trees,
Reforestation, Lining Out Stock since 1923*

During our 40 years in business, thousands and thousands of growers and nurserymen have come to rely on Western Maine as their preferred source of healthy, vigorous evergreen seedlings and transplants.

The reasons for this preference are many: (1) We use tested methods of propagation, planting, fertilizing, irrigating and spraying that continually improves the quality of our trees . . . methods that produce strong, healthy trees with compact fibrous root systems and thick, rich-green foliage. (2) We use efficient methods that enable us to in-

crease production per man hour and thus keep prices as low as possible, consistent with the size and quality of our trees. However, we have never sacrificed quality for quantity. (3) Western Maine Evergreens benefit by their unique environment. Grown in our rich, fertile soil and subjected to the extreme temperatures of our unusually rugged Maine climate, they develop a hardiness that is unequalled. (4) Our careful digging, selection and packing for shipment guarantees that Western Maine customers receive only the finest evergreens, ready to grow and make money for them.

HARRY

We cordially invite you to join the thousands of wholesale customers who rely on Western Maine Forest Nurseries year after year for the best in evergreen seedlings and transplants.

Harry and Harold Eastman

HAROLD

PLANT THIS FALL!

Fall is considered by many the ideal time to plant evergreens. Our fall shipping season begins about September 1 and extends through November 15. Naturally, with quality so widely recognized, there's a big demand for Western Maine Evergreens. So we urge

you to select your transplants or seedlings from this folder now and order early while all varieties are in good supply. We'll acknowledge your order immediately and ship when you specify. Remember, all transplants are covered by our liberal guarantee.

How To PLANT 1000 TREES a Day

One man, using our specially designed planting spade, can plant up to 1000 trees per day. Follow these easy steps for rapid planting.

1. Insert spade straight into ground.
2. Pull back and push forward to form wedge

shaped opening.

3. Spread roots carefully and place tree in hole.
4. Close opening, stamp soil on both sides firmly.

Harold Eastman checking growth of seedlings in one of our seedbeds.

Especially built transplanting machines manned by expert crews make efficient work of transplanting millions of trees each spring.

WESTERN MAINE FOREST NURSERY CO. — Established 1923
Pioneer Commercial Growers of Evergreen Seedlings and Transplants

America's Finest Evergreens

WHOLESALE PRICES – Fall 1963

It takes no more time or labor to plant top quality stock than inferior stock. So why not plant the best—from Western Maine—and reap the dividends of better livability, faster, fuller growth, and earlier returns on your investment? From selection of seed right through to packing for shipment, our special methods and extra attention to details assure you the finest evergreens available anywhere at any price. You'd expect to pay more for this superior quality, but, as you can see below, you don't. So don't gamble with lesser quality—plant Western Maine Evergreens.

Photo shows excellent branch and root development on these Arborvitae, Blue Spruce and White Spruce transplants.

TRANSPLANTING INFORMATION

The figure 2-2, shown in the price list, represents the number of years the trees have been in seed beds, the number of years in transplant beds and the number of times transplanted. The first figure indicates the number of years the trees remained in the seed bed before being transplanted. The second figure indicates the number of years the trees remained in the transplant bed. The total of the figures indicates the age of the tree and each dash represents one transplanting. Thus, a 2-2 Douglas Fir is a 4-year-old tree which remained in the seed bed two years, was transplanted and remained in the transplant bed two years.

SCOTCH PINE

For several years we have been experimenting with various strains of Scotch Pine and with seed from different sources. We believe that we now have a very good selection to choose from. The Spanish and French strains seem to be quite compact and have excellent color.

*RESTRICTIONS ON SHIPMENT OF PINES

Regulations prohibit shipment of any pines into the states of California, Idaho, Montana, Nevada, Utah, Oregon, Washington, and Hawaii. In addition to the above states, White Pines may not be shipped into Arizona or Colorado.

SHIPPING WEIGHTS

The following shipping weights are approximate, due to the different varieties. Weight per thousand trees including packing, material and crates, will average as follows:

SEEDLINGS 25 to 50 lbs.

TRANSPLANTS 3-yr. 28 lbs., 4-yr. 100 to 200 lbs., 5-yr. 200 to 300 lbs.

Trees shipped by freight or truck cannot be guaranteed.
